

Invitation to RSNA

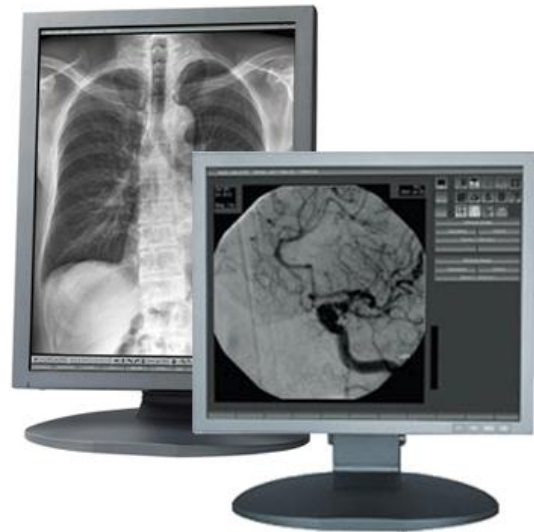

Also this year we would like to invite you to our booth RSNA. We got some new exciting products we would like to introduce to you.

You can find us at a Booth # 3536 - South Hall

New diagnostic display - ME205 and CCL210
No RSNA without new products. This year we would like to announce the LED upgrade of two entry level products.

ME205

ME205 is the successor of ME201L and a entry level 2MP greyscale display with new LED backlight. With a brightness of 1000cd/m² and a contrast of 1000:1 it is perfectly suitable for primary diagnostic usage.

CCL210

CCL210 is a perfect diagnostic Display for CT or MR. With its LED Backlight and high contrast of 1500:1 it offers a realistic re- production of color and greyscale images.

Gaze Finder

Gaze finder was developed in cooperation with various universities and is a new way to determinate Autism Spectrum Disorders of babies, of up to one year. It is using dedicated images and videos together with a state of the art eye-tracking technology to diagnose ASD. All this is done within one minute. So far already 600 babies have been tested.

See you in Chicago
