
JVCKENWOOD Selected as Supplier Engagement Leader, the Highest Rating in the CDP 2025 Supplier Engagement Assessment

Yokohama, May 28, 2026—JVCKENWOOD Corporation has been selected for the first time as a Supplier Engagement Leader, the highest rating in the 2025 Supplier Engagement Assessment conducted by CDP, a global non-profit organization operating an international environmental disclosure system. In addition, the Company was selected for the first time for CDP's Climate Change A List, the highest rating in the 2025 Climate Change Assessment ([press release on December 22, 2025](#)).

In the Supplier Engagement Assessment, efforts by companies to address climate change-related issues in their supply chain are evaluated in five categories: governance and business strategy, supplier engagement, Scope 3 emissions, risk management processes, and targets. Companies with particularly outstanding initiatives are selected as Supplier Engagement Leaders.

JVCKENWOOD's Sustainable Procurement Initiatives

Under its corporate philosophy of "Creating excitement and peace of mind for the people of the world," JVCKENWOOD promotes sustainability management based on two pillars: profitable growth and solving social issues on a global scale. Recognizing the importance of conducting sustainable procurement in its supply chain while taking into consideration the environment, human rights, and other demands for society, the Company has set "building a responsible supply chain" as one of the materialities in its medium-term management plan VISION 2030. Sustainable procurement is being promoted on a global basis.

JVCKENWOOD is also working toward reducing environmental and social impacts throughout the supply chain by requesting that all suppliers conduct self-audits using the Self-Assessment Questionnaire (SAQ) and encouraging them to proactively report and work toward reducing their impact. In addition, its work to introduce environment-related metrics for determining executive compensation, to disclose Scope 3 emissions, and to conduct third-party verification was highly evaluated, leading to its selection for this year's award.

The Company will continue to strive to build a sustainable supply chain through its business activities and contribute to the realization of a sustainable society.
