**Partial Revisions to “Accounting Report for the Fiscal Year Ended March 2009”  
(including correction of texts and figures)**

The JVC Kenwood Group, as announced in the “Report of the Investigation Committee and Summary of Adjustments to Previous Earnings Results; Delay in Submission of Quarterly Report on Earnings Results for the Third Quarter; and Prospect for Assignment to Securities Under Supervision (Confirmation)” dated February 8, 2010, decided on a policy to adjust the previous earnings results of JVC Kenwood and Victor Company of Japan, Limited (JVC) with regard to losses of JVC, a consolidated subsidiary of JVC Kenwood, upon receipt of a report at the Board of Directors meeting of JVC Kenwood held on February 8, 2010 concerning the results of the investigation conducted by the Investigation Committee, including outside experts.

Under this policy, JVC Kenwood has simultaneously conducted validations and reviews of the details of the investigation results, adjustments to the previous earnings results, accounting audits, etc. Having finalized specific revisions through these proceedings, we hereby announce the partial amendments to “Accounting Report for the Fiscal Year Ended March 2009” dated April 28, 2009.

Due to many different revisions, it is difficult to understand them simply by a list of corrections, and hence, we attach all texts after correction in English. Corrected portions are underlined.

## Accounting Report for the Fiscal Year Ended March 2009 (April 1, 2008 - March 31, 2009)

### Consolidated Financial Highlights for the Fiscal Year Ended March 2009 (April 1, 2008 - March 31, 2009)

#### Selected Operating Results (Millions of yen, except net income per share)

	FYE 2009	FYE 2008	Compared with the previous fiscal year (%)
	April 1, 2008 to March 31, 2009	April 1, 2007 to March 31, 2008	
Net sales	<u>311,299</u>	-	-
Operating profit	<u>(1,537)</u>	-	-
Ordinary income (loss)	<u>(9,760)</u>	-	-
Net income (loss)	<u>(30,734)</u>	-	-
Net income (loss) per share	<u>(46.14)</u> yen	-	-

FYE: Fiscal year end

#### Sales by Segments (Millions of yen)

	FYE 2009		Compared with the previous fiscal year (%)
	April 1, 2008 to March 31, 2009	April 1, 2008 to March 31, 2009 (Reference) Sum of both companies' results	
Car Electronics	92,237	120,800	-
Home & Mobile Electronics	<u>105,412</u>	<u>243,800</u>	-
Professional Systems	78,758	105,600	-
Entertainment	30,616	61,000	-
Others	4,274	14,300	-
Total	<u>311,299</u>	<u>545,603</u>	-

FYE: Fiscal year end

Note: The results for the fiscal year ended March 2009 (reference) are the sum of JVC Kenwood's operating results for the fiscal year under review and JVC's operating results for the first half of the said year and rounded off. The net sales in JVC's operating results for the first half are calculated using the net method (in which a portion of customer discounts is deducted from gross sales) in the same way as in the second half.

### Major Products in Each Segment

Car Electronics	Car Audio, Car AV Systems and Car Navigation Systems
Home & Mobile Electronics	Video Cameras, LCD TVs, Projectors, Pure Audio and AV Accessories
Professional Systems	Land Mobile Radio Equipment, Video Surveillance Equipment, Video Equipment, Audio Equipment and Display Equipment
Entertainment	Music and video software, such as CDs and DVDs

## Qualitative Information and Financial Statements

### Operating Results

#### (1) Analysis of Operating Results

##### 1. Consolidated operating results for the year ended March 2009

JVC KENWOOD Holdings, Inc. (JVC Kenwood) was established on October 1, 2008, as a joint holding company of Victor Company of Japan, Limited (JVC), and Kenwood Corporation (Kenwood), following the integration of their management.

When established, JVC Kenwood adopted the business-combination accounting method with Kenwood as the acquiring company. Hence, the consolidated operating results of JVC Kenwood for the fiscal year ended March 2009 (from April 1, 2008 to March 31, 2009) are the sum of Kenwood's consolidated operating results for the year under review and JVC's consolidated operating results for the second half of the year under review (from October 1, 2008 to March 31, 2009).

The JVC Kenwood Group, which reorganized the core businesses of JVC and Kenwood into four business segments, started its operations on October 1, 2008, as a new corporate group, and changed the calculation method for JVC's net sales to the net method (in which a portion of customer discounts is deducted from gross sales). Since the operating results of JVC Kenwood for the year under review cannot be compared simply with the combined operating results of JVC and Kenwood for the fiscal year ended March 2008, the operating results for the previous fiscal year are not stated in this report.

#### Overview of the fiscal year under review

In the fiscal year under review, the US-originated financial turmoil affected the real economy around the world in the second half, and the global economy further worsened toward the end of the period. The yen strengthened sharply against other currencies.

Under such circumstances, the Group, anticipating deterioration in the business environment, established the "Profit Structural Reform Conference" at the time of management integration to quickly realize synergies, while forcefully implementing profit structural reforms including emergency measures. In the fourth quarter of the year under review, however, the business environment of the Group became even worse due to the deteriorated real economy and the yen's further appreciation, which forced the Group to revise its earnings forecast announced at the time of the management integration. Against this backdrop, the Group implemented more thorough emergency measures as well as additional measures focusing on structural reforms in the display sector, the car electronics OEM sector and the home audio sector, where profitability issues remain, reforms of affiliated companies, and employment structural reforms including the adoption of early retirement preferential treatment programs.

The above structural reforms produced favorable effects, resulting in an operating profit of more than 10.0 billion yen for the second half, which exceeded our original projections, reducing fixed expenses on a Companywide basis, and improving earnings of the above business sectors. However, earnings were impacted by the yen's sharp appreciation compared with the previous term and a fall in sales for the second half of the year under review. As a result, consolidated earnings results for the term under review were lower

TRANSLATION - FOR REFERENCE ONLY -

than the sum of earnings results of Kenwood for the previous term and the earnings results of JVC for the second half of the previous term, in terms of sales and profits.

In preparing consolidated operating results for the fiscal year under review, the exchange rates the Group uses (excluding those for forward exchange contracts) are as follows:

	1Q	2Q	3Q	4Q
U.S.\$	¥105	¥108	¥96	¥94
Euro	¥163	¥162	¥127	¥122

**\* Net sales**

Net sales for the fiscal year under review were 311,299 million yen. This reflects a change in the calculation method for JVC's net sales to the net method at the time of management integration, as well as transfer and cessation of non-core businesses and curtailment of unprofitable operations, which were carried out under the structural reforms before the management integration. In addition to these factors that we had expected would weigh down net sales, net sales were adversely affected by the yen's sharp rise and by a fall in sales of products.

For reference, when adding JVC's net sales for the first half of the fiscal year under review, combined net sales for both JVC and Kenwood were approximately 546.5 billion yen for the full fiscal year.

**\* Operating profit**

Operating profit for the year under review decreased from a year ago due to the yen's steep rise and a drop in sales amid the economic deterioration. In the fourth quarter in particular, the Group, aiming to cope with excessive inventory in the entire consumer electronics market, reduced inventory substantially and achieved proper levels, by focusing on promoting the sale of products already on the market while adjusting production, for example, through reducing the number of workers at domestic and overseas plants. However, earnings worsened owing to further price declines. In addition, the launch of new products, such as car electronics for the consumer market and camcorders (video cameras), which we had pinned our hopes on, did not have an apparent effect until March 2009, due to the amount of products already on the market, resulting in a delay in the improvement of earnings.

On the other hand, the profit structural reform, which was launched at the same time as the management integration, generated cost reduction effects (about 9.0 billion yen) and cost synergy effects (around 1.4 billion yen), and the management integration produced accounting effects (approximately 1.4 billion yen). These effects totaled approximately 11.8 billion yen. Although operating profit in March alone greatly improved and was in the black, operating loss for the year under review was about 1,537 million yen.

For reference, when adding JVC's operating profit for the first half of the fiscal year under review, the combined operating loss of both JVC and Kenwood was about 4.0 billion yen for the full fiscal year.

**\* Ordinary income**

Ordinary income for the fiscal year under review was minus 9,760 million yen. This reflects a decrease in operating profit, though non-operating income and expenses improved due to such factors as accounting effects resulting from the management integration (about 1.1 billion yen) and cost synergy effects (around 0.3 billion yen) despite our booking of temporary expenses and others in relation to the management integration.

For reference, when adding JVC's ordinary income for the first half of the fiscal year under review, the combined ordinary income of both JVC and Kenwood was about minus 16.5 billion yen for the full fiscal year.

**\* Net income**

Net income for the fiscal year under review was minus 30,734 million yen. This reflects a decrease in ordinary income, booking of extraordinary loss in association with expenses for additional measures implemented

during the fourth quarter, such as business structure and employment structure reforms, and the lack of gains on sales of securities, which was seen in the previous term. Meanwhile, favorable factors include the provision of allowances for expenses for additional measures that can be recorded as allowance, and accounting effects (about 6.6 billion yen) which were generated through the adoption of the consolidated taxation system in relation to the management integration.

For reference, the combined net income of both JVC and Kenwood was about minus 42.9 billion yen for the full fiscal year due mainly to extraordinary losses resulting from a sharp decline in domestic sales of consumer LCD TVs by JVC in the first half of the fiscal year under review.

### Net Sales, Profits and Losses by Business Segment

Net sales and operating profit by business segment are as follows:

(Millions of yen)

Segment		FYE 2009	FYE 2009 (Reference) Sum of both companies' results
Car Electronics	Net sales	92,237	120,800
	Operating profit	<u>(4,179)</u>	(2,600)
Home & Mobile Electronics	Net sales	<u>105,412</u>	<u>243,800</u>
	Operating profit	<u>(1,345)</u>	<u>(3,900)</u>
Professional Systems	Net Sales	78,758	105,600
	Operating profit	<u>4,506</u>	<u>4,200</u>
Entertainment	Net sales	30,616	61,000
	Operating profit	<u>248</u>	<u>0</u>
Others	Net sales	4,274	14,300
	Operating profit	<u>(766)</u>	<u>(1,800)</u>
Total	Net sales	<u>311,299</u>	<u>545,603</u>
	Operating profit	<u>(1,537)</u>	<u>(4,006)</u>
	Ordinary income	<u>(9,760)</u>	<u>(16,525)</u>
	Net income	<u>(30,734)</u>	<u>(42,890)</u>

Note: The results for the fiscal year ended March 2009 (reference) are the sum of JVC Kenwood's operating results for the fiscal year under review and JVC's operating results for the first half of the said year. Net sales and operating profit figures below 100 million yen in this table are rounded off. The net sales in JVC's operating results for the first half are calculated using the net method (in which a portion of customer discounts is deducted from gross sales) the same way as in the second half.

#### \* Car Electronics Business

The Car Electronics business, though susceptible to new car sales fluctuations, is a business sector that is most expected to realize integration effects. In the mainstay consumer car audio sector, we implemented sales activities by leveraging the strengths of JVC- and Kenwood-brand products while enhancing cost competitiveness with cost synergy effects, despite the deteriorating economy. As a result, our market shares increased in the world's principal markets from the previous fiscal year. Meanwhile, in the consumer car multimedia sector, sales of AV-integrated car navigation systems expanded largely in overseas markets through our collaboration with Garmin Ltd., a market leader of PNDs\*, and sales of such systems rose sharply from the previous year in terms of volume.

In the fourth quarter, however, prices of products already on the market dropped steeply due to excessive inventory in the overall market. To cope with this, the Group focused on promoting sales of product lines for 2008 while adjusting production, which resulted in reducing inventory significantly and achieving a proper level of inventory. However, earnings worsened due to further price drops. Furthermore, the effect of the launch of new product lines for 2009 did not become apparent until March 2009, thus delaying an improvement in earnings. On top of this, sales slowed in the fast-growing markets, a result of both the financial crisis and the strong yen.

Meanwhile, single-month sales in the consumer sector for March 2009 reached their highest level since the management integration. Although the sector posted an operating profit, this failed to offset earnings that continued to worsen until February.

In the OEM sector, shipments of CD/DVD mechanisms for onboard equipment increased sharply, while sales of genuine products decreased substantially due to a drop in new car sales and a decline in the use of genuine products by automakers. To cope with this, the Group reviewed its development and production systems, and implemented additional measures in the fourth quarter. Through these efforts, we managed to minimize the increase in losses.

As a result, net sales of this business for the fiscal year under review were 92,237 million yen, and operating loss was 4,179 million yen.

For reference, when adding JVC's consolidated earnings results for the first half, combined net sales of this business of both JVC and Kenwood for the full fiscal year were about 120.8 billion yen and the combined operating loss of the two companies for said period was around 2.6 billion yen.

*\* PND stands for "portable/personal navigation device."*

### **\* Home & Mobile Electronics Business**

In the display sector, the market environment deteriorated due mainly to price drops amid fierce competition. However, the most unprofitable operations in the domestic market were curtailed significantly before the management integration, and the effects of restructuring—in which we shifted in-house production at the UK plant (that was then closed) to outsourced production in Eastern Europe—and additional measures materialized.

The home audio sector suffered a fall in sales, affected by the economic downturn and a change in consumer demand. Against this backdrop, the Group curtailed unprofitable models and strengthened the profitable AV accessory operations, while implementing additional measures, such as spinning off the home audio sector of Kenwood, and shifting to a development and production system that utilizes JVC's factory in Malaysia. Consequently, earnings of this sector also improved.

Regarding the camcorder sector, sales of standard type models were strong in the worldwide market, and we focused on selling hi-vision type models in the domestic market. As a result, the lineup of camcorders increased in added value and our market share for camcorders expanded. In the fourth quarter, however, the Group focused on promoting sales of product lines for 2008 while adjusting production, as it did for consumer car electronics, which resulted in a reduction in inventories of product lines for 2008 and achievement of a proper level of inventory. Despite this, earnings worsened owing to further price falls. Furthermore, the effect of the launch of new product lines for 2009 did not become apparent until March 2009, and thus an improvement in earnings was delayed.

As a result, net sales of this business for the fiscal year under review were 105.412 million yen, and operating loss was 1,345 million yen.

For reference, when adding JVC's consolidated earnings results for the first half, the combined net sales of this business of both JVC and Kenwood for the full fiscal year were about 243.8 billion yen and the combined operating loss of the two companies for the said period was around 3.9 billion yen.

### **\* Professional Systems Business**

The professional wireless equipment sector—a key profit base—was affected by the yen's appreciation, and sales of equipment for private industries succumbed to the adverse effects of the slumping economy. In the latter half of the third quarter, orders received in the US for products for public safety communications, which had been strong thanks to the diffusion of digital, professional wireless equipment, slowed down prior to the new US fiscal year. However, such orders received recovered in March 2009, and single-month sales in local currency of the professional wireless equipment sector marked a record high.

In the professional systems sector, overall sales weakened due to the deteriorated economy. However,

sales of new models of professional cameras were robust in the overseas markets, and orders received increased, centering on professional cameras for the electric installation industry in the domestic market in March 2009. Therefore, sales in this sector picked up.

As a result, net sales in this business for the fiscal year under review were 78,758 million yen, and operating profit was 4,506 million yen.

For reference, when adding JVC's consolidated earnings results for the first half, the combined net sales of this business of both JVC and Kenwood for the full fiscal year were about 105.6 billion yen and the combined operating profit of the two companies for the period was around 4.2 billion yen.

#### \* **Entertainment Business**

In the content sector, sales of old releases fell while sales of new releases were steady thanks to the massive popularity of some blockbuster movies and animation. Sales in the businesses on consignment, such as pressing, distribution and production of music software, decreased, but earnings improved due to cost reduction effects.

As a result, net sales of this business for the fiscal year under review were 30,616 million yen, and operating profit was 248 million yen.

For reference, when adding JVC's consolidated earnings results for the first half, the combined net sales of this business of both JVC and Kenwood for the full fiscal year were about 61.0 billion yen and the combined operating profit/loss of the two companies for the period was at a breakeven point.

## **2. Outlook for Current Fiscal Year**

The JVC Kenwood Group predicts that the business environment it experienced in the fourth quarter of the fiscal year under review will continue for the current term (the year ending March 2010), and has formulated a profit/loss plan for the current period with net sales and operating profit for the fourth quarter of the fiscal year under review as the basis, assuming exchange rates of JPY90 to the U.S. dollar and JPY120 to the euro. Our business began showing signs of improvement in the US from March 2009, although improvement in the European business is still slow. Given this, we project the business environment seen in the fourth quarter of the year under review will continue in the first half of the current term, and some of our businesses will fare slightly worse, more so in the first quarter than the fourth quarter of the term under review. We also forecast our business will bottom out in the second quarter of the current fiscal year.

Under the above assumption, we have incorporated cost reduction effects of 20.0 billion yen per year, which we estimate will be generated by additional measures, into the earnings outlook for the current fiscal year. Therefore, we predict that consolidated net sales and operating profit will be 430.0 billion yen and 9.5 billion yen, respectively. Ordinary income and net income will be 3.0 billion yen and 0.0 billion yen, respectively, taking into account non-operating income and expenses, extraordinary profit and loss, taxes, etc.

Aiming to achieve the above earnings targets, the Group is implementing various measures to substantially improve earnings. These include completing structural reforms in sectors where profitability issues remain but earnings have improved, such as the display sector, and by boosting sales of new products and focus products in the professional wireless equipment sector, where orders received have recovered, and the car electronics consumer sector and the camcorder sector, where the launch of new products has begun on a full-scale basis.

For specific measures, please see "Issues to be Addressed" provided later.

## **(2) Analysis of Financial Position**

### **1. Analysis of Assets, Liabilities and Net Assets**

#### **Change in assets and liabilities in relation to management integration**

When the above-mentioned management integration was implemented on October 1, 2008, which falls under "acquisition" in business-combination accounting, in accounting terms it was considered that the acquiring

company Kenwood took on JVC's assets and liabilities as of October 1, 2008, at market value.

Consequently, JVC Kenwood stated 6,202 million yen as "goodwill." After being assessed, this was fully recognized as an impairment loss in the third quarter under review.

On March 23, JVC Kenwood acquired all of its shares, which were owned by Kenwood at the time of the management integration, in the form of property dividend from Kenwood, and converted these shares into treasury stock. After the acquisition of its shares, outstanding shares of JVC Kenwood totaled 966,886,000 shares, excluding treasury stock, an 11.29% decrease from the time of the management integration.

### **Assets and liabilities for the term under review**

Total assets at the end of the fiscal year under review were 344,077 million yen, reflecting an aggressive reduction of inventory and a proactive sale of real estate, as part of profitability and business structural reforms, despite a decrease in trade notes and accounts receivable.

Total liabilities were 269,638 million yen, including interest-bearing debts of 134,100 million yen and net debts of 81,683 million yen.

Net assets totaled 74,439 million yen. Total shareholders' equity was 90,116 million yen, but the foreign currency translation adjustment account amounted to a loss of 20,113 million yen due to the strong yen.

## **2. Cash Flow Analysis**

### **Cash flows from operating activities**

Cash flows from operating activities amounted to a net inflow of 10,424 million yen due to a decrease in necessary operating funds caused by a reduction in inventory, despite income before income taxes of 28,559 million yen.

### **Cash flows from investing activities**

Cash flows from investing activities amounted to a net outflow of 11,288 million yen, owing to the acquisition of tangible and intangible fixed assets, despite proceeds from sales of fixed assets.

### **Cash flows from financing activities**

Cash flows from financing activities amounted to a net inflow of 9,265 million yen, mainly because of an increase in short-term borrowings.

As of the end of the term under review, cash and cash equivalents totaled 52,393 million yen, due to a rise in cash and cash equivalents by 32,517 million yen in relation to the management integration.

### **Cash Flow-Related Indexes**

	FYE 2009
Shareholders' equity ratio (%)	<u>21.1</u>
Market value-based shareholders' equity ratio (%)	<u>9.9</u>
Ratio of interest-bearing liabilities to cash flows (%)	-
Interest coverage ratio (times)	-

Calculation methods:

- Shareholders' equity ratio = Net assets / Total assets
- Market value-based shareholders' equity ratio = Stock market capitalization / Total assets
- Ratio of interest-bearing liabilities to cash flows = Interest-bearing liabilities / Operating cash flow
- Interest coverage ratio = Operating cash flow / Interest payments

Notes:

- All indexes are calculated using consolidated financial data.
- Stock market capitalization is obtained by multiplying the closing share price at the term end with the number of outstanding shares at the term end (excluding treasury stock).

- Cash flows for the fiscal year under review do not include cash flows of JVC for the first half, and “Ratio of interest-bearing liabilities to cash flows” and “Interest coverage ratio” are not stated.

### **(3) Basic Policies for Distribution of Profits and Dividends for Term Under Review and Next Term**

JVC Kenwood considers it one of the most important managerial issues to provide shareholders with stable returns on their investments, and will decide on details such as the distribution of retained earnings by comprehensively taking into account profitability and financial conditions.

For the term under review (the fiscal year ended March 2009), Kenwood paid an interim dividend of two yen per share, the same amount as its annual dividend for the year through March 2008, with September 30, 2008 as the record date, prior to the management integration. In the second half of the term under review, the economic environment deteriorated more than had been expected, and this eliminated any restructuring and integration effects. Against this backdrop, we must concentrate our management resources to accomplish an earnings recovery in the future. Therefore, JVC Kenwood will refrain from paying term-end dividends.

For the next term (the fiscal year ending March 2010), we will not make an interim-dividend payment for similar reasons, and will decide on year-end dividends later taking into account profits, losses and other financial conditions for the first half.

### **(4) Notes to Financial Statements Regarding Going Concern**

The JVC Kenwood Group, given its high percentage of overseas sales, experienced sharp falls in earnings in the consumer electronics and professional electronics segments due primarily to the impact of U.S.-originated financial instability on the real global economy and to the rapid strengthening of the yen. The Group posted a net loss of 30,734 million yen for the consolidated fiscal year after adjustments to previous earnings results implemented in the fiscal year ending March 2010. Also, the amount of shareholders' equity on the consolidated basis of JVC amounted to 86,370 million yen at the end of the fiscal year under review, and it is in breach of a financial covenant clause contained in the commitment line contract of a syndicated loan to JVC (totaling 25,500 million yen; 1,000 million yen repaid in June 2009; on September 30, 2009 and December 28, 2009, a total of 20,000 million yen refinanced after the contract term of three months). As a result, the JVC Kenwood Group, on a consolidated basis, as of the end of the fiscal year under review, is in a situation that raises doubts over its status as a going concern assumption. However, we implemented countermeasures to solve these risks, as described in “(3) Issues to be Addressed” in “Management Policy.” As a result of considering the feasibility of such countermeasures, the Group judged that there are no significant uncertainties regarding our status as a going concern.

## **Management Policy**

### **(1) Basic Management Policy**

Regarding the management integration as the starting point of a new growth strategy, a basic policy of the JVC Kenwood Group is to develop corporate bases that JVC and Kenwood have built into a new sustainable business infrastructure to succeed in the digital era, enhance competitiveness and profitability, expand and create corporate value taking advantage of synergistic effects from management integration, and establish a position as a unique, specialized world-leading manufacturer.

To survive the ongoing worldwide economic crisis, the Group is striving to generate funds and complete structural reforms, to redistribute management resources to promising business fields in order to shift its business stage from survival to growth at an early date, and implement measures for future growth.

## **(2) Medium- to Long-Term Management Strategies**

On October 1, 2008, the JVC Kenwood Group set management targets for the fiscal year ending March 2011 (net sales of 750.0 billion yen and operating profit of 39.0 billion yen) assuming exchange rates of JPY105 to the U.S. dollar and JPY155 to the euro. Since then, however, the economic environment has worsened rapidly, and we are now considering formulating a new medium-term management plan that takes into account these new developments. We will announce revised management targets as soon as a new medium-term management plan is drawn up.

## **(3) Issues to be Addressed**

Since the management integration, the JVC Kenwood Group has pushed forward with profit structural reforms to contend with the deterioration of the economic climate, while making efforts to stimulate the early materialization of integration effects. In the fourth quarter of the fiscal year under review, however, our business environment worsened further due to the deteriorated real economy and the appreciation of the yen. In response, the Group carried out bold additional measures which it had mostly completed by the end of the term under review.

The Group has implemented measures for future growth by redistributing management resources created by these efforts.

For the next term (the fiscal year ending March 2010), to cope with the deteriorated business environment, we will accelerate business activities with an emphasis on cash management, as we did in the term under review, while also creating cost improvement effects of 20.0 billion yen or more through additional measures and promoting strategies that are expected to contribute to earnings in the early stages of the next term and also growth over the medium and long term.

### **1. Priority Measures**

#### **1) Increase and creation of cash**

During the fiscal year under review, the JVC Kenwood Group implemented cash management-focused business activities on a Groupwide basis, producing cash (about 5.6 billion yen) through sales of fixed assets such as the Victor Shimbashi Building and the former site of JVC's Moriya Plant, and increasing cash flows through a substantial reduction of inventory. Following the fiscal year under review, the Group will accelerate business activities focused on cash management for the next term by decreasing the number of inventory days through reforms in this area and innovating management of funds on a global basis, thereby creating free cash flows.

#### **2) Completion of structural reforms**

##### **\* Profit structural reform**

With the integration of management on October 1, 2008, the Group launched a profit structural reform project, anticipating the deterioration of the economic climate. The project included cost structural reforms designed to overhaul the corporate and business divisions in terms of expenses, review development costs and IT-related investments, and the reform of transactions within the Group by strengthening consolidated management, as well as emergency measures such as the partial return of executives' remuneration and a review of events. As a result, we produced cost reduction effects of about 9.0 billion yen at the stage of calculation of operating profit for the fiscal year under review.

For the next term, we will continue to enhance emergency measures, aiming to gain substantial effects from the additional measures summarized below.

##### **\* Additional measures**

During the fourth quarter of the term under review, the Group implemented additional measures centering on: the restructuring of JVC's display sector, Kenwood's car electronics OEM sector and the home audio sector, a

common business area of both companies, where profitability issues remain; structural reforms of related production/sales systems and affiliated logistics/services firms; employment structural reforms, including the cutback of approximately 2,950 Group employees (as of April 20, 2009), 12.8% of the total number of employees (23,089) at the time of management integration; and further emergency measures such as the partial return of executives' remuneration. Of these measures, the most urgent were completed by the end of the term under review.

For the next term, the Group will aim to produce cost improvement effects of 20.0 billion yen or more by combining the cost reduction effects gained from the above-mentioned profit structural reform and by actualizing the effect of these additional measures.

In a series of reforms, we restructured the manufacturing system of Kenwood Nagano Corporation ("Kenwood Nagano"), the main domestic factory of the car electronics OEM sector, a process which included labor cutbacks. Accordingly, we decided not to reorganize Kenwood's domestic production system through the merger between Kenwood Nagano and Kenwood Yamagata Corporation, announced on April 15, 2008.

### **3) Expansion of profitable sales**

#### **\* Revitalization of existing businesses through enhanced integration**

Centering on J&K Technologies Corp. ("J&K Technologies"), a joint venture between JVC and Kenwood which capitalized on combined development and production functions in both companies' car electronics businesses, the Group generated a cost synergy effect of about 1.7 billion yen in the second half of the fiscal year under review. This was achieved through joint development, joint procurement of parts and mutual use of intellectual property.

For the next term, we will integrate the remaining product planning and marketing functions of JVC and Kenwood into J&K Technologies, aiming to turn J&K Technologies into a virtually independent corporation.

In the home audio sector, another common business area, we also plan to unite both companies' management resources to deepen business integration.

Regarding the professional systems business, the Group will accelerate measures for early maximization of integration effects, mainly by promoting sales activities of a new multimedia security system that combines Kenwood's professional wireless terminal, a command and control system provided by Zetron Inc. ("Zetron"), Kenwood's US subsidiary specializing in wireless communications systems, and JVC's security system.

On April 1, 2009, we integrated JVC's subsidiary Victor Kosan Co., Ltd., and Kenwood's subsidiary Kenwood Admi Corporation, both engaged chiefly in welfare services, and established J&K Partners. For the next term, we will further promote integration of affiliated companies, through consolidation of domestic service bases and reorganization of overseas logistics bases.

#### **\* Implementation of growth strategies with development investments**

With the market environment expected to worsen further in the short term, the JVC Kenwood Group has selected its most robust products and services—which provide differentiation from rivals by leveraging its technical capabilities and can thus serve as a growth engine for the Group—as top strategic products that can quickly contribute to its earnings.

JVC Kenwood and the companies under its umbrella, JVC, Kenwood and J&K Technologies, will do their utmost to support these products and services with funds, technical know-how and personnel to develop chosen products and technologies, and strengthen sales promotion. Through these efforts, we will expand sales globally and improve profitability.

In the medium to long term, the Group will accelerate the development of new, unconventional products in line with our Corporate Vision, centering on the New Business Development Center.

## **2. Priority Measures by Business Sector**

### **\* Car Electronics Business—Turning J&K Technologies into a virtually independent corporation**

We will accelerate reform in the Car Electronic business, one of our main focuses during the fiscal year.

The Car Electronics business is the largest common business between JVC and Kenwood and this is where integration effects can be most expected to be produced. The JVC Kenwood Group will integrate the product planning and marketing functions of JVC and Kenwood into J&K Technologies, aiming to turn J&K Technologies into a virtually independent corporation, as well as strengthen the business structure by promoting wide-ranging personnel exchanges between both companies. According to these measures, the Group will develop the status of its management through cooperation into complete business integration, and endeavor to maximize integration effects at the earliest possible time through combination of the development, production, product planning and sales functions, including integration of platforms for car audio and car navigation systems. Based on these measures, in the consumer sector, we will further heighten cost synergy effects while expanding product lineups, centering on car navigation systems, pursuing the top global position. In the OEM sector, we will complete structural reforms and develop new car navigation systems and devices for car-mounted equipment by using both companies' management resources.

#### **\* Home & Mobile Electronics Business**

In the display sector, we improved earnings by reducing in-house development and production of consumer LCD TVs for the overseas markets through the use of outsourcing, ODM (original design manufacturing: production outsourcing from the design phase onward) and EMS (electronics manufacturing service), reconstructing our domestic production system, concentrating the initial process for printed-wiring board production at our Thai plant, reforming sales structures in Japan, the Americas and Europe, and reorganizing the systems for logistics and services. Owing to these efforts, we cut development personnel for conventional types of consumer LCD TVs by about 70%, and assigned these employees to sectors engaged in, for example, development of next-generation displays. Taking advantage of such reforms, we will manufacture and sell full hi-vision 3D LCD monitors and slim-profile LCD monitors (7 mm at their thinnest part), for professional use, thereby accelerating improvement of earnings through optimization of product lineups.

Regarding the home audio sector, we split Kenwood's home audio division and shifted to a fabless structure specializing in the planning and sales of products while accelerating joint development, production and parts procurement by using JVC's plant in Malaysia, which boasts a robust development function. JVC also reduced unprofitable models and curtailed in-house development and production of commodity models. Looking forward, we will further deepen business integration by combining both companies' management resources, while increasing sales of value-added products, such as home theater systems with Blue-ray Disc players and other AV accessories. We will therefore accelerate improvement of earnings.

In the camcorder sector, the entire market suffered from excessive inventory and sales continued to be weak, especially in Europe. Under such circumstances, the JVC Kenwood Group focused on sales of product lineups for 2008 while adjusting production, which resulted in reducing inventory substantially by the end of the fiscal year under review. Moving forward, we will introduce new hi-vision models, which are selling well in the domestic market, in the worldwide market on a full-scale basis, and concurrently launch new concept products, aiming to heighten the added value of our product lineups.

#### **\* Professional Systems Business**

Regarding the professional wireless sector, we boast the world's second largest market share with sales of products for the public safety market (police, fire department and public transportation, such as railways and buses) being especially robust in the overseas markets. Given that investments are expected to increase in the public, safety and environment fields worldwide, the JVC Kenwood Group will boost sales of digital professional wireless equipment, for which demand is on the rise due to advanced features such as high privacy functions, and expand business domains from supply of wireless terminals to supply of system solutions that feature the wireless communications command and control systems of Zetron.

In the professional systems sector, the Group will strive to win more orders for security cameras by

introducing new product lineups, and will proactively implement sales activities of a new multimedia security system that combines a professional wireless terminal, a wireless communications command/control system and a security camera. Capitalizing on these initiatives, we will aim to raise the ratio of B to B business—particularly for the public safety market—through the entire Group, and to establish a stable earnings structure that is resistant to economic fluctuations.

**\* Entertainment Business—Capital and business alliance with Toppan Printing Co., Ltd.**

Regarding the Entertainment business, the JVC Kenwood Group implemented restructuring reforms in January 2009 through the integration and reorganization of Victor Entertainment, Inc., and JVC Entertainment Company, LTD., to strengthen its base for creating hit content.

Under the new framework, we will create a diverse array of hit content on a Groupwide basis while developing the net media business centering on a newly established network/distribution company, aiming to improve profitability.

We will expand the media business by integrating the pressing processes for entertainment and non-entertainment CDs/DVDs. To this end, we will make the most of a capital and business alliance concluded recently among JVC, Victor Creative Media Co., Ltd., a subsidiary of JVC which engages in the pressing of CDs/DVDs, Toppan Printing Co., Ltd., and its subsidiary Toppan Seihon Co., Ltd.

By implementing the above measures, we will eliminate any material adverse effects on earnings results and financial conditions of the JVC Kenwood Group that were stated in “(4) Notes to Financial Statements Regarding Going Concern” in “Operating Results.”

**3. Basic policy on control of a joint-stock company**

If we judge that any acquisition of shares by specific persons or groups would infringe on the corporate value of a Group company or the common interests of its shareholders, we consider it necessary to take substantial measures to raise the corporate value and ensure the common interests of shareholders, to the extent permitted by laws, regulations and the articles of incorporation. We in JVC Kenwood, well aware of the importance of raising our corporate value and ensuring the common interests of our shareholders, are carefully studying the necessary measures. So far, however, we have not introduced any specific anti-takeover measures or such like.

**4. Financial covenants**

With respect to the commitment line contract of syndicated loans whose financial covenants were violated, we have deleted the financial covenants of the said contract by signing a modification agreement with the lenders, as of the date of submitting the revised Accounting Report for the Fiscal Year Ended March 2009. We have no concerns about the lenders demanding an immediate repayment of the said loans in relation to the loss of the benefit of the term. In the future, we expect to refinance and repay bank borrowings, including the above syndicated loans. Major related financial institutions have established their policies to continuously support us in these respects.

**Notes on earnings forecast**

<p>The earnings forecast provided here is a forecast for the future period based on the Company's judgment derived from information that is available at this time; please be advised that actual earnings may differ substantially from the earnings forecast. Consequently, please refrain from making any decisions based solely on this forecast.</p>
